

LPRng

LPRng - An Enhanced Printer Spooler

The LPRng software is an enhanced, extended, and portable implementation of the Berkeley LPR print spooler functionality. While providing the same interface and meeting RFC1179 requirements, the implementation is completely new and provides support for the following features:

- Complete (no databases needed) lpr, lpc, and lprm programs
- Dynamic redirection of print queues; automatic job holding
- Highly verbose diagnostics
- Multiple printers serving a single queue
- Client programs do not need to run SUID root
- Greatly enhanced security checks
- Greatly improved permission and authorization mechanism
