

RetroOSMC

Решение для запуска [RetroPie](#) в [OSMC](#).

Установка

Процесс описан: <https://github.com/mcobit/retrosmc>

Установку производим от имени пользователя osmc

1. SSH into your OSMC installation. The default account is osmc and the password is also osmc.
2. Move to the home directory

```
cd /home/osmc
```

```
wget https://raw.githubusercontent.com/mcobit/retrosmc/master/install-retrosmc.sh
```

3. Make the script executable

```
chmod +x install-retrosmc.sh
```

4. Run the script

```
./install-retrosmc.sh
```

```
Welcome to the retrosmc installation.  
What would you like to do?
```

- ```
1 Install retrosmc
2 Install Launcher Addon
3 Remove Launcher Addon
4 Update scripts
```

```
< OK > <Отмена> |
```

Установка: 1 Install retrosmc

Установки расширения для [OSMC](#): 2 Install Launcher Addon

Настройка

```
/home/osmc/RetroPie-Setup/retropie_setup.sh
```

Resetting controller configuration

Меню:

- P Manage packages
- core Manage core packages
- 811 emulationstation (Installed)
- C Configuration / Options
- 1 Clear/Reset Emulation Station input configuration

После сброса настроек будет выдано сообщение:

```
/opt/retropie/configs/all/emulationstation/es_input.cfg
has been reset to default values.
```

[Resetting controller configuration - RetroPie Forum](#)

Ошибка при запуске

Нужно добавить `cd /home/osmc` в скрипт:

[/home/osmc/RetroPie/scripts/retropie.sh](#)

```
#!/bin/bash

cd /home/osmc
```
